

FIG. 2

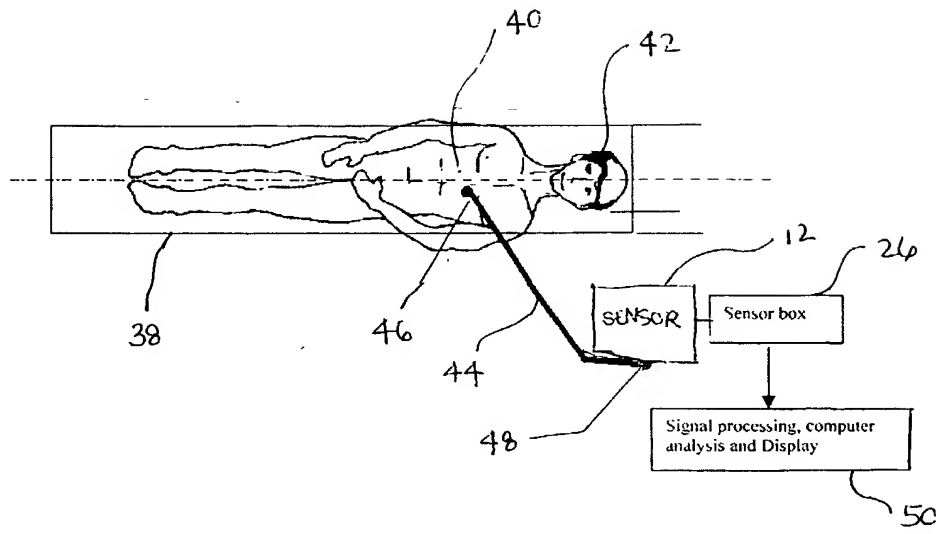

Figure 4 is a graph showing three stacked waveforms. The top waveform is labeled "EKG" and has a sharp peak. The middle waveform is labeled "Acceleration" and has a sharp peak corresponding to the EKG peak. The bottom waveform is labeled "Displacement" and has a broad peak corresponding to the EKG peak. A bracket labeled "250" groups the Acceleration and Displacement waveforms. Other labels include "252" for the EKG waveform, "256" for the Acceleration waveform, and "264" for the Displacement waveform.
